-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Applicant's election in a paper dated 3/23/04, without traverse, of claims 1, 2 and 6 is acknowledged.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1,2 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Dawson et al '578.

Dawson shows a transparent substrate 12 of sapphire, a buffer layer 13 of GaN, a III-V GaN layer 16, and "convex" light trapping members 50 with index of refraction approximately 1.8. Accordingly claims 1 and 6 are anticipated. Claim 2 is rejected as aluminum oxide material is taught on page 3.

Claims 1,2 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Hata '558.

Hata shows in figure 1 a sapphire substrate 1, a "convex" light trapping member 2 of aluminum oxide, and a GaN layer 3. See paragraphs 31-34. Accordingly claims 1, 2 and 6 are rejected.

Wang ' 465 is similar relevant art.
